

# TAS InPay

## Insurance Payments

Secure, **easy** payments **anywhere**, in a win-win solution for insurance companies, creditors and debt holders

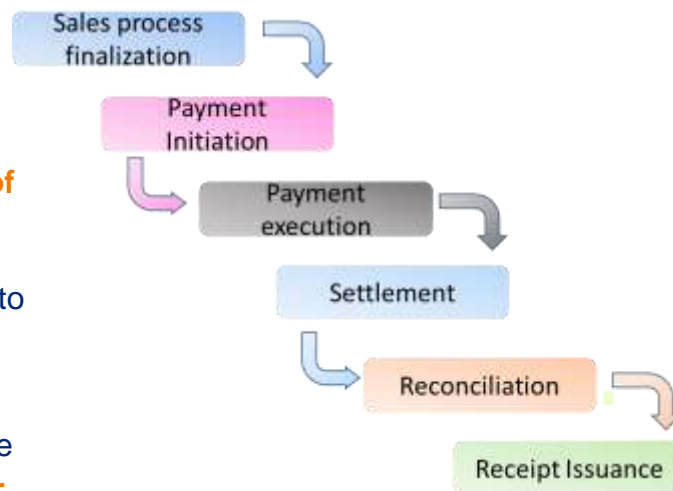

- ✓ **Multi-channel platform** (web, mobile) for innovative processes of e-billing, e-collections and e-payments
- ✓ **e-Billing Engine & centralized Repository**
- ✓ Smart **Gateway** to orchestrate innovative and traditional payment systems (SEPA SCT and SDD, POS and mobile POS, MyBank, mobile payments, etc.)

# TAS InPay

An integrated, multi-channel platform based on PayTAS solution suite, for the **real-time collection and payment of products and services** of the **Insurance Sector** and affiliated creditors (Public, Corporate)

**allows customers, individuals or legal entities to:**

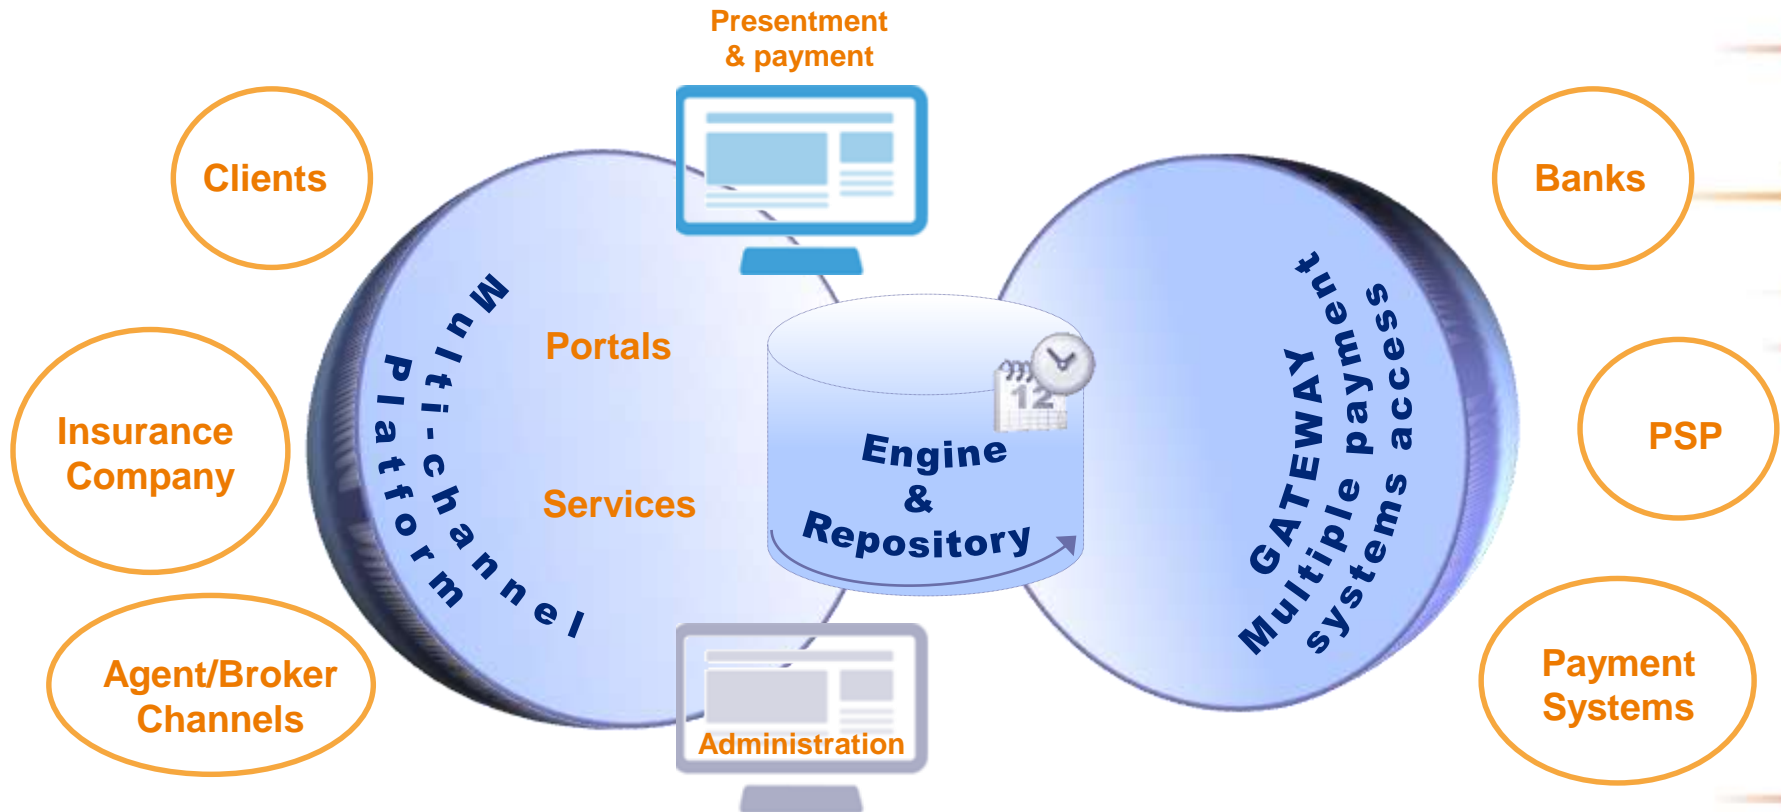

- access a **comprehensive view of their own debt situation** with the insurer, including present, past, synthetic views, and the possibility to obtain invoices / receipts in a self-service mode
- have payment services accessible **in real-time, multi-channel, multi-tool mode**

**allows companies and related sales channels to:**

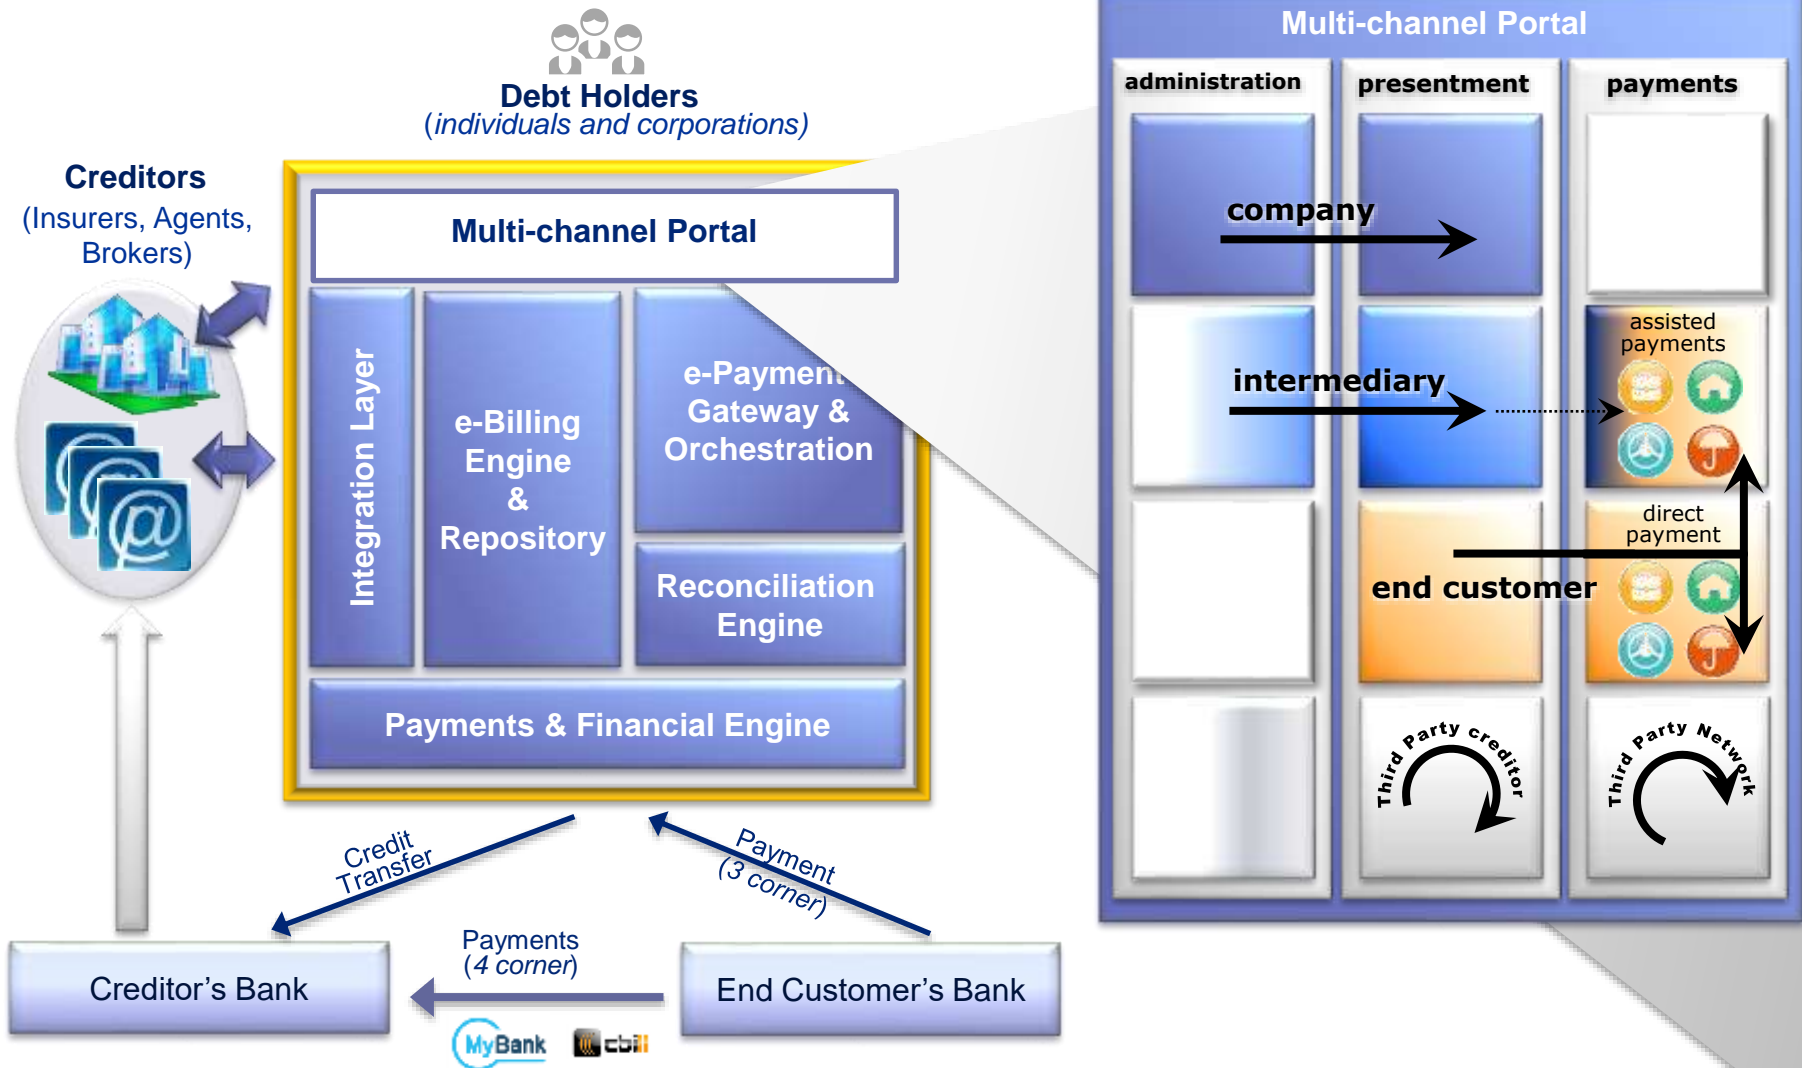

- benefit of the **evolution and innovation in collections and digital payments** with transparency and lower investment and upgrade costs
- obtain reporting information on cash flows of every commercial channel in advance, with **automatic reconciliation** of the product and service sold / provided
- **reduce costs** related to «cash» management by digitizing processes, automating collections and payments verification

# TAS InPay: the three areas of the suite

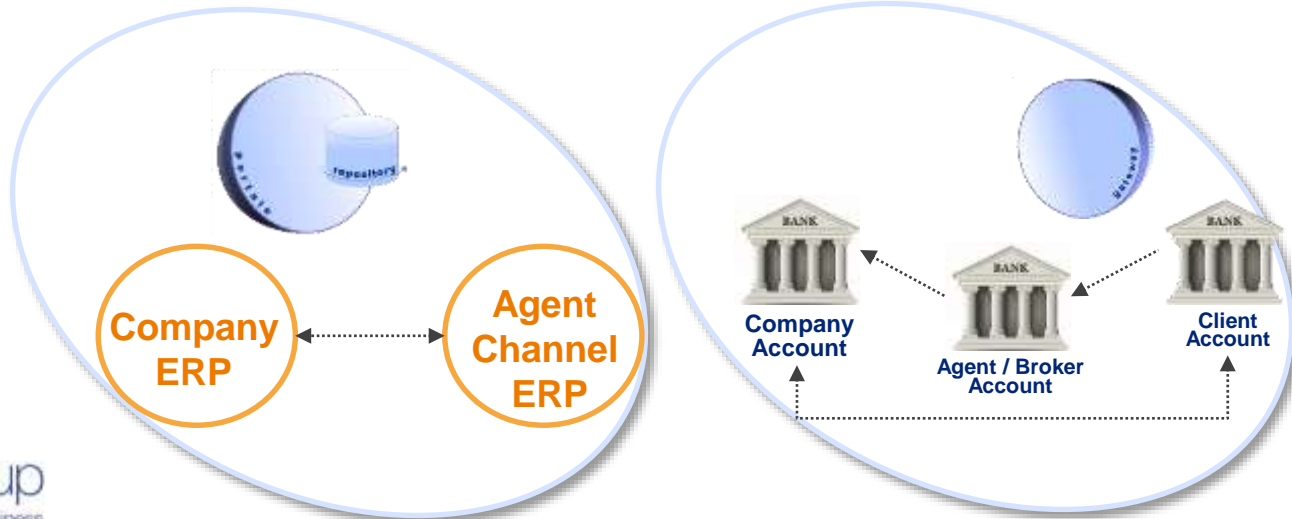

- InPay allows for complete and real-time control of the collections process, with automatic reconciliation and multi-channel payment history, reducing the complexities and costs related to the rapid evolving payment ecosystem.

# TAS InPay: omni-channel digital insurance

# TAS InPay: non-invasive integration model

- ✓ InPay can become the unified front-end for all types of insurer collections
- ✓ InPay works without changing the existing account models and can facilitate process optimization into digital viewpoints without invasive impact towards existing ERP systems in the company.

# TAS InPay: Strengths

**InPay is a modular and parametric platform accessible from every device, which decouples company systems from the collection and payment systems:**

- ✓ guaranteed by TAS: the leading Italian software solutions provider for electronic money, payments and capital markets;
- ✓ allows the access via proprietary or client's adapters to networks and existing payment channels; it is open to innovations in the payments industry, including NFC, Digital wallet, P2P, mobile POS, MyBank, etc.
- ✓ developed in cross-sector environments and recently customized specifically for the insurance market while keeping its unique IT features:
  - ✓ developed according to banking security standards
  - ✓ exposes web-services that facilitate the integration in the legacy systems of the company
  - ✓ already operating in complex and highly structured organizations such as banks and public administration
  - ✓ usable both as an in-house or SaaS solution
- ✓ delivers the company greater operational and business autonomy and control over processes usually managed directly by the payment service provider.
