

## Press release

### TAS Group at Sibos 2019

**Milan, 4th September 2019** - TAS Group is excited to be one of the official exhibitors at Sibos 2019 in London. Over four days, from 23-26 September, around 8,000 delegates from the world of finance, business and technology will come together in the UK's capital to debate and collaborate in the areas of payments, securities and cash management.

This year's theme, *Thriving in a Hyper-Connected World*, recognizes the challenges and opportunities that mass digitization and data-driven relationships present for the financial community, and explores the impact of new technologies on infrastructures, value propositions and business models.

During the event TAS Group will showcase its latest ISO20022/PSD2-compliant solutions covering Liquidity Management, Open Banking, Instant Payments and Fraud Management.

Delegates will have the opportunity to speak with TAS experts at booth I120. By scheduling a one-to-one meeting they can learn about product innovations, receive a tailored demo and discuss how they can transform their legacy systems, meet new regulatory requirements and stay relevant in a changing payments landscape.

Mario Mendia, Head of Capital Markets and Treasuries at TAS Group, will be speaking about the strategic challenges arising from the upcoming Eurosystem Target2 migration in his Sibos Open Theatre 2 session on 23 September at 12.15 pm. During Mario's informative session he will look at the key implications for IT systems emerging from the consolidation project, including a wider adoption of the ISO 20022 standard, and reveal how these can be fully leveraged by the banking industry and turned into an opportunity for treasury digital transformation.

TAS Group is well placed to offer advice to the financial industry, having been operating alongside central, national and major retail banks and financial market operators for over 35 years. During its life the Fintech company has been a Regional Partner of SWIFT and has supported customers by applying its intimate knowledge of global payments infrastructures, platforms and standards, from T2/T2S for Clearing and Settlement to CBI Globe for Open Banking, gained through high-profile projects undertaken with central and national banks. By leveraging this unique knowledge and experience, TAS Group helps customers modernize and optimize their core applications, adopt new enabling technologies and transform compliance obligations into business opportunities.

The team looks forward to seeing you in London!
