Unlocking PSD2 opportunities for PSPs & TPPs

Europe's Payment Services Directive PSD2 has fundamentally changed banking forever. The Payments Industry is experiencing an unprecedented level of disruption.

Established market players need to reinvent their business strategies focusing on customers' needs and leveraging new digital technologies.

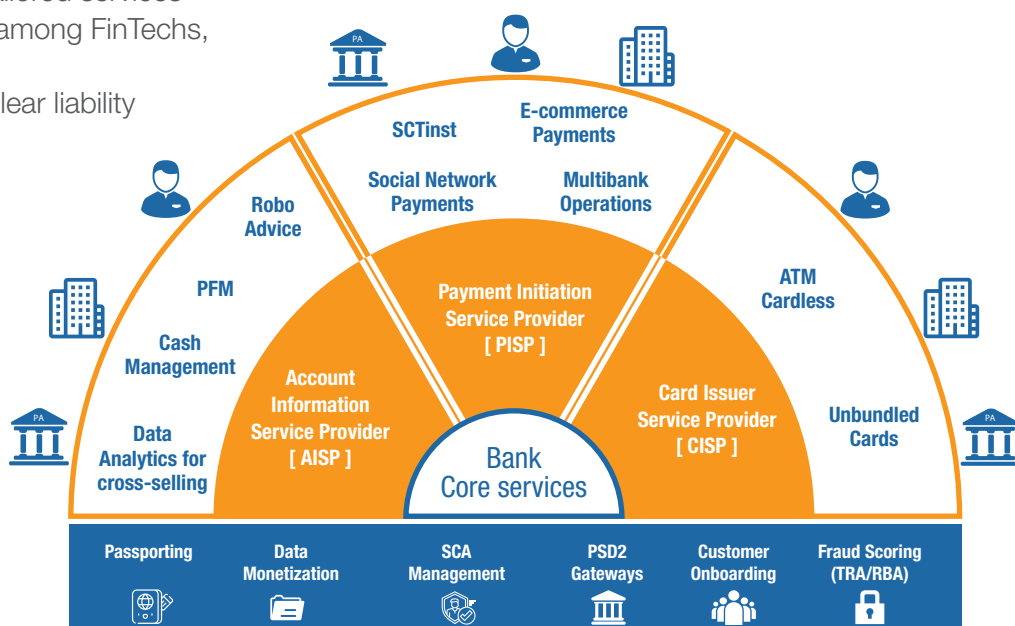

PSPs must streamline their backend processes to allow for real-time, 24x365 availability and be fully open to incoming API-based service requests from authorized Third Parties.

Regulated TPPs have to find their role in the new ecosystem, choosing the right Partners and best business model: one that is economically sustainable and profitable.

PSD2 & Opening Banking: A new customer-centric paradigm

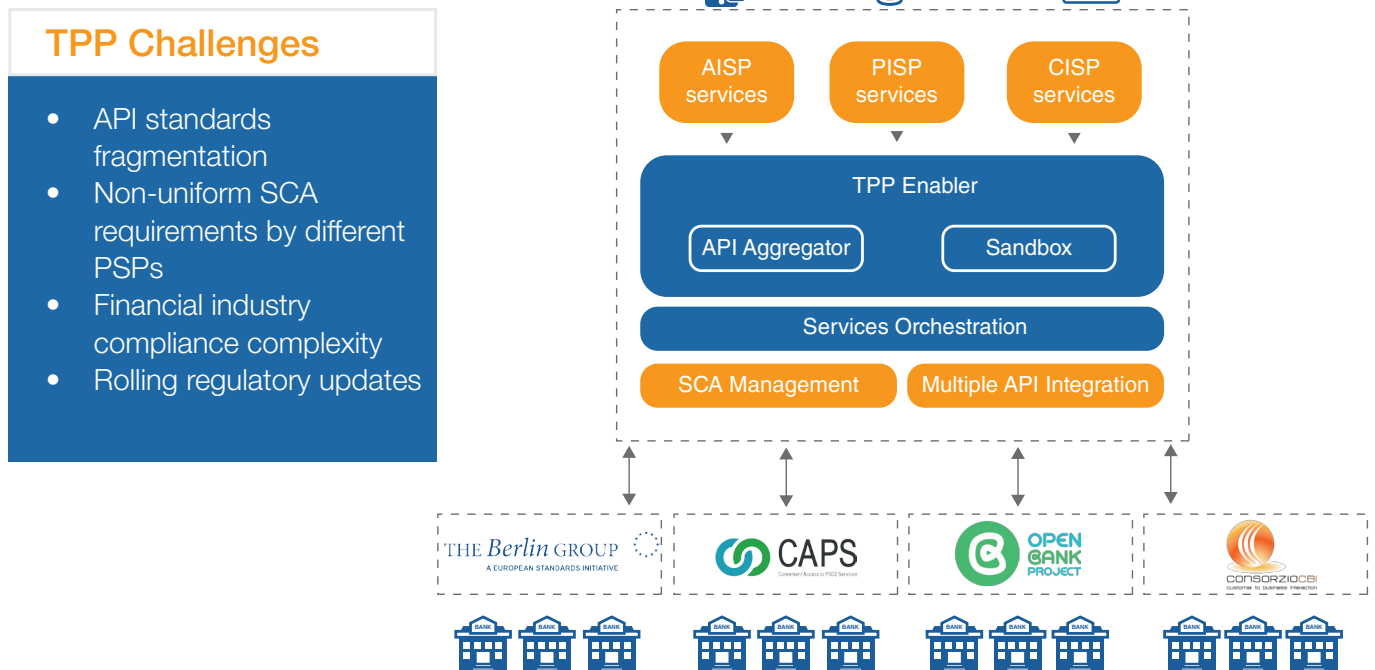

offering:

- Greater convenience for the consumer
- Improved targeting for tailored services
- Maximum collaboration among FinTechs, TPPs and PSPs
- Increased security and clear liability allocation

The turnkey white-label platform that allows PSPs and TPPs to:

- Attract new customers and generate revenue by quickly adding new payments products & services
- Stay competitive and play an active role in the new payments ecosystem
- Keep up-to-date and comply with the latest PSD2 regulations and standards
- Take advantage of the latest technologies without burdening their infrastructure

Key benefits of the TAS TPP Enabler:

- Supports multiple open banking standardization initiatives
